

Background

This portfolio was created for my Photography Hons. degree with the [Open College of the Arts \(OCA\)](#).

My major portfolio describes the virtual boundaries of Windsor Great Park, those boundaries that restrain the unadventurous tourist but allow the adventurous to explore. This, secondary portfolio attempts to demonstrate my love of travel and to capture the character of some of the places and of the people that have captivated me on my travels.

The images on the following pages link back to my website where larger images can be viewed.

Artist's Statement

Moments are all too often lost to the passage of time as memories fade and experiences taint those memories. For me, making photographs has never been a case of replacing those moments, of clutching onto those memories but more a case of enhancing the experience, of being able to record the character of a person in a different way or of capturing the soul of the moment.

These images, of people and of places around the world, attempt to pass on that sentiment, to allow the viewer to create their own experience by looking and sharing that moment.

If they encourage just one person to travel or simply to experience the world outside I will have succeeded in my aim.
